

Primary PE and School Sport Funding: Report for Financial Year 2017/18

Background

All schools in England receive PE and sport premium funding which must be used to make additional and sustainable improvements to the quality of PE and sport we offer.

We use the funding to:

- develop or add to the PE and sport activities that our school already offers
- build capacity and capability within the school to ensure that improvements made now will benefit pupils joining the school in future years

How much funding did we receive?

In financial year 2017/18 we received £13,900

This table illustrates what we have done with this funding , its impact and its legacy.

Activity/ Resource	£	How has the money been spent?	Impact the school has seen on pupils' PE and sport participation and attainment	How the improvements will be sustainable in the future
Experience of a 'different' sport	£2,700	Off site visits to: YR Low Ropes Course at Malvern Outdoor Centre; Y1/2 a Yoga specialist activity day; Y3/4 and Y5/6 an outdoor water sports activity day at Croft Farm Activity Centre.	Pupils have universally enjoyed the activities and has broadened their experience, providing engagement with a sport they might not, ever, otherwise access.	A legacy of partaking in a variety of interesting sports not normally engaged in as part of the standard curriculum will provide greater inclination to participate and pursue them and a wide range of other sports into their future lives.
NSEA membership	£240	Annual membership of the National Schools Equestrian Association.	Several pupils partake in weekend equestrian events under the banner of the school.	For the school to support and celebrate equestrian sports provides pupils with a sense of pride in their school, in education and in the sport itself.
On-going letting fee, maintenance and upkeep of the Parish Field	£400	The field is for school use during the daytime and reverts to community use during evenings and weekends. By maintaining it we are making it fit for purpose as well as fulfilling our obligations under the parish field lease to maintain and enhance it as a sporting facility.	This well maintained facility engenders a sense of pride in the pupils when they take part in team events and sporting events on the field.	Having a high quality, well used play /sports field will provide long term health and well-being benefits. Pupils enjoy and benefit from the facility whilst attending the school. In addition this will establish activity experiences and habits that will last, we hope, throughout their lives.

Travel to/from sports fixtures	£2,300	Often we relied on the goodwill of parents to sort out transport between themselves in order to take children to/from certain events.	The provision of safe, reliable and convenient transport is an improvement for all concerned: safety is enhanced; staff and parents' time is saved. They are able to attend a wider range and greater number of sports events.	Pupils gain a better impression that sport counts and has status thus making it more likely they will pursue sport beyond their Primary years.
PE equipment	£500	Equipment stocks have been replenished and enhanced.	Pupils are better disposed to pushing themselves to train harder resulting in better performance levels and greater self-esteem.	Improvements in individual performances make it more likely that pupils will pursue sport into their future lives at both high school and, in turn, into their adult lives.
Upton Area of Schools Sports Partnership	£1,000	Along with other local primary schools we purchased the time of a specialist member of the local high school staff who organised and ran a wide range of inter-school sports events.	Many more pupils than otherwise might be the case are given access to a wide range of sports in both a competitive and non-competitive environments.	Pupils are inspired by sport as something that is fun and exciting. Pupils making the transition to this High School are better prepared for the move.
Trim Trail	£800	Maintenance and repair of school's Trim Trail.	After repair the return to full use of the whole circuit saw a marked rise in the number of pupils opting to use the trail.	Enhanced balancing skills develops body-strength, reduces the risk of injury and heightens participation in physical activity and sport.
Parallel Bars	£650	Installation of Traverse Rope in outdoor area of Reception Class.	Upper body and core muscle development and strengthening.	Core strength is central to pupil development and safe participation in subsequent physical activity and sport.
PE/sport Equipment	£550	Replacement of worn equipment. Purchase of new equipment.	Greater enthusiasm to participate in new sports previously not provided for eg golf.	Experience when young in a wide range of sport makes engagement at secondary level and beyond more likely.
Gloucs Cricket Club	£70	School membership of Gloucester Cricket Club.	Membership enabled school to participate in inter-school tournaments.	Playing cricket in tournaments provides focus and raises the standard of play at every age.
Rugby Coaching	£700	All year groups received coaching from Gloucester Rugby Club.	We have become Small School Champions!	Increased interest in rugby inside and outside school.
First Aid Kits	£40	Purchase of two kit bags for external tournaments.	Develops pupils' respect for the potential hazards and seriousness of undertaking sport.	Effective treatment of injuries is important to continued performance
Carry Forward	£3,950	Funding carried forward pending project approval under new Headteacher, in post September 2018.
